Federal DOT Users – How to Access RSIS Applications with MyAccess

In order to login to applications with MyAccess, you will first need to setup the Okta Verify application on your DOT computer or mobile device. The OCIO has released the following documentation to register for Okta Verify. Most users will likely follow the first document to get setup for authentication on their DOT computer with their PIV card, however, authenticating with your mobile device is also an option.

Step 1: Okta Verify Registration

Click one of the following to get started to begin MyAccess/Okta Enrollment:

- **PIV Card Holders**
- **Non PIV Card Holders**

Step 2: Logging into RSIS Apps

1) After setting my Okta Verify, you can simply navigate to any of the RSIS apps as you have in the past, and you will be presented with the following options. Choose the Login button under the "MyAccess" section on the right.
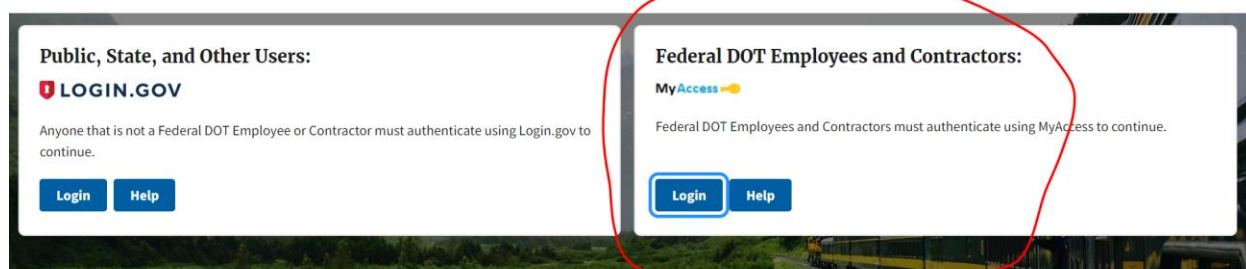

2) You will be forwarded to authenticate with MyAccess using your DOT credentials.
3) Once authenticated, you will be forwarded to the intended application.
   a. If you do not have an account or roles for accessing the application, you will be instructed to contact the RsisHelpdesk@dot.gov for access to the particular application
